FAURECIA JOINS ENTREPRISES POUR L'ENVIRONNEMENT (EPE) FRENCH ASSOCIATION MARKING ITS COMMITMENT FOR THE ENVIRONMENT

Faurecia, one of the world's leading automotive technology companies, becomes a member of *Entreprises pour l'Environnement* (EpE). EpE is a French association bringing together more than 60 French and international companies from all business sectors, willing to better include the environment in their strategy and business decisions. As the world is currently mobilized for the Climate Week, Faurecia's membership marks a new step in the Group's environmental commitment, in particular through its ambitious roadmap towards CO₂ neutrality*.

Convinced that environmental issues pose a serious challenge for humanity, Faurecia is addressing key topics such as climate change, biodiversity, resources savings, etc. and has defined a roadmap to reach CO₂ neutrality for its internal emissions by 2025 (scopes 1 and 2). By 2030, Faurecia will reduce by half its scope 3 controlled emissions and the Group aims for full CO₂ neutrality by 2050, including the use phase of its products.

Deployed since 2020, this action plan has been approved by the Science Based Target initiative (SBTi) and is compatible with the trajectory required to limit global warming to +1.5°C, the most ambitious scenario of the Paris agreement. Faurecia partners with an ecosystem of key players to reduce energy consumption and use renewable energies across its sites. All actions focus on three principles: use less, better and longer. The Group also commits to the circular economy and invests significantly in sustainable materials to reduce the environmental footprint of its products, and in batteries and hydrogen technologies for zero-emission mobility.

Rémi Daudin, Faurecia Group Sustainable Transformation Vice President said: *"We are delighted to become a member of EpE, as we consider sustainability – and the environment in particular- as a key component of Faurecia's performance. Through our CO₂ Neutrality program, we want to act now for future generations, become a leader in the environmental transformation, and lead the industry change."*

Isabelle Cornu, Faurecia Group Sustainable Development Director & Faurecia Foundation General Delegate added: *"At Faurecia, we have made a strong commitment to protect the planet. Through joining EpE, we look forward to discussing environmental best practices with our fellow members and better embed our care for the planet in Faurecia's business strategy."*

*As per SBTi validation "Faurecia commits to reduce absolute scope 1 and 2 GHG emissions 80% by 2025 from a 2019 base year. Faurecia also commits to reduce absolute scope 3 GHG emissions 46% by 2030 from a 2019 base year."

About Faurecia

Founded in 1997, Faurecia has grown to become a major player in the global automotive industry. With 266 industrial sites, 39 R&D centers and 114,000 employees in 35 countries, Faurecia is a global leader in its four areas of business: seating, interiors, Clarion Electronics and clean mobility. The Group's strong technological offering provides carmakers with solutions for the cockpit of the future and sustainable mobility. In 2020, the Group reported total turnover of €14.7 billion. Faurecia is listed on the Euronext Paris market and is a component of the CAC Next 20 index. Find out more at: www.faurecia.com
