

## Press Release

Nanterre (France), September 5, 2018

### **FAURECIA SHOWCASES AIR QUALITY & OPTIMIZED COMFORT SOLUTIONS AT "AUTOMECHANIKA" 2018 – HALL 4.0, BOOTH F37/F31**

For the first time at the "Automechanika" trade fair (Frankfurt, September 11-15), Faurecia, one of the world's leading automotive technology companies, will be showcasing advanced technologies for the aftermarket.

#### **Technologies for improving air quality**

Last year, Faurecia Service launched a portfolio of solutions for its Clean Mobility activity into the aftermarket for emissions reduction. At Frankfurt, Faurecia Service will present its extended range of innovative solutions for both air quality and driver wellness:

- **"Easy2fit®", an all-in-one exhaust kit for optimized logistics:** every fourth car worldwide is equipped with an exhaust system from Faurecia. This expertise has enabled the company to develop "Easy2fit®", a complete exhaust line that fits in a standardized and robust box providing advantages for transportation, storage and installation. This exhaust kit enables great savings in logistics and more efficiency in the workshop.
- **"DPF Maintenance Machine" for clean service performance:** Faurecia Service will also present a promising innovation for workshop equipment with its newly developed DPF Maintenance Machine for efficiently cleaning diesel particulate filters and therefore improving their life time.
- **"ASDS™" advanced air quality retrofit technology:** with "ASDS™", Faurecia has developed a powerful de-NOx system for buses and trucks that eliminates up to 99 percent of nitrogen oxide pollutants. The method, in which pure ammonia is stored in solid form in the vehicle, improves air quality through more efficient conversion of NOx emissions, especially at low exhaust gas temperatures. This solution has already been implemented through retrofit projects for numerous urban bus fleets and trucks in Copenhagen, London and South Korea. A track record of 60 million kilometers on the road shows that ASDS™ is a fast and cost-effective way to reduce NOx in cities and improve air quality.

#### **Intelligent solutions for more security and comfort in the cockpit**

Faurecia also provides forward-looking technologies for smart vehicle interiors.

- **"Active Wellness Express™" – more comfort and security for professional drivers:** Faurecia is presenting a groundbreaking innovation with its "Active Wellness Express™", the first seat cover for professional drivers with premium car comfort and wellness features. It is the first seat cover that uses sensors to monitor health and wellness data including heart rate and respiratory rate. Active Wellness Express will thus improve safety, comfort and well-being of drivers.

***We cordially invite you to the Faurecia booth in Hall 4 (Booth F37/F31) – we look forward to your visit.***
