FAURECIA STAFF PRINT MASK SHIELDS FOR FRONTLINE PUBLIC SERVICES IN SPAIN

As part of global efforts to contain the COVID-19 pandemic, Faurecia staff in Valencia, Spain have mobilized by using 3D printers to provide local frontline services with mask shields.

In one of the worst-affected countries in Europe, Faurecia employees are working in conjunction with public health services and security forces, coordinating production, assembly and delivery while ensuring strict adherence to sanitary measures. The Group is supporting these efforts by lending its R&D Center's 3D printers to staff, who are all contributing to this project remotely. To date, the team is producing around 150 mask shields each day.
